

GAME PROGRAMMING

Game Programming is part of Interactive Media and Game Development Academy. The Game Programming Track provides students with the skills needed to design and develop interactive games. It covers core concepts such as programming fundamentals, game physics, graphics rendering, artificial intelligence, and game engine development. Through hands-on projects, students gain practical experience in creating engaging gameplay, optimizing performance, and building complete games for various platforms.

JOB PROFILES

**Game Programmer · Unity Developer · XR Programmer ·
Unreal Developer · Engine Programmer · Game Designer**

TOTAL HOURS

1,212^{hrs}

Theory + hands-on labs

DELIVERY

Blended

Online & on-site

UNIVERSITY GRADE

Pass

Minimum grade required

Where graduates work

Who may apply

Applicants must have a first degree from a recognized university or institution of higher education with a minimum grade of Fair or higher.
