

ARCHITECTURE DESIGN AND VISUALIZATION

complete architectural journey. This track starts with the fundamentals of residential, public, and landscape/urban design, moves through the industry's most powerful 2D and 3D visualization tools, the track also covers sustainability and LEED standards, execution fundamentals, materials, and quantity surveying (QS).

Graduates leave with end-to-end experience across the entire architecture pipeline — from the first sketch to project delivery.

JOB PROFILES

- ARCHITECTURAL DESIGNER. • ARCHITECTURAL VISUALIZER •
- LIGHTING DESIGN ENGINEER • TECHNICAL OFFICE ENGINEER •
- ARCHITECT SITE ENGINEER • ARCHITECTURAL BIM TECHNICIAN.

Who may apply

Open to graduates in

- FACULTY OF ENGINEERING ,
 - FACULTY OF APPLIED ARTS.
 - FACULTY OF FINE ARTS.
 - FACULTY OF ARTS & DESIGN.
 - INSTITUTES & ARTS ACADEMIES Engineering,
 - URBAN PLANNING.
- with a minimum grade of Good or higher.

Selection process

01 IQ & English Exam

Online exam covering problem-solving aptitude and English proficiency.

02 Technical Exam

Computer-based assessment covering the program's core technical fundamentals.

03 Technical Interview

Interview with the technical committee.

04 Interpersonal Interview

Candidates who pass the technical interview are invited to this final stage.

Program content – 1,386 hours

CATEGORY	HOURS	SHARE	KEY COURSES
● Design Concept	115 hrs	8%	This module focuses on how to start an architectural design from scratch — understanding project requirements, analyzing the site and needs, and developing an initial design concept that forms the foundation for any building (residential or public) before moving into execution details.
● 2D Presentation Techniques	180 hrs	13%	A hands-on module focused on turning architectural ideas into professional, presentable 2D visuals
● 3D Presentation Techniques	420 hrs	30%	"This module introduces the participant to a wide range of the industry's leading 3D visualization tools, enabling them to choose and adapt their presentation approach based on each project's needs."
● BIM for Architects	140 hrs	10%	This module introduces trainees to BIM (Building Information Modeling) as a modern professional standard in the architecture industry
● Lead & Sustainability	90 hrs	6%	This module introduces the participant to sustainable design as a core principle of modern architecture
● Execution Engineer	50 hrs	4%	This module bridges the gap between design and construction, giving the participant practical knowledge of how architectural designs are actually built on site.
● Soft Skills	91 hrs	7%	Communication Essentials for Professionals, High Impact Presentations, Job Seeking Skills, Professional Demeanor
● Graduation Project	300 hrs	22%	participants apply everything they've learned to design and develop a complete product or furniture piece — from initial concept to a market-ready outcome — in collaboration with an industry partner.

Student Deliverable

A fully developed architectural project — from initial planning through to execution-ready documentation — including complete 2D & 3D visualizations, technical drawings, and a sustainability strategy aligned with LEED standards. The final output is a portfolio-ready project that demonstrates the ability to take a design from concept to construction.

Before you apply

- ✎ The Participant should be "The trainee must be familiar with the fundamentals of engineering design, along with a general background in architectural visualization tools and methods (2D/3D)
