

Student Summer Training

One of ITIDA's Human Capital Development Programs (HCDP)

"Student Summer Training," one of ITIDA's Human Capital Development Programs (HCDP), began in 2014. It offers hands-on training on the up-to-the-minute technology trends for the students. This summer practice considers increasing the students' capacities and well prepares them to the IT market post-graduation.

Overview

Students' Summer Internship is one of the Human Capacity Development Programs launched by the Information Technology Industry Development Agency (ITIDA) in 2014. The program provides free practical training on the latest technology trends for the students. It aims to build students' capacities and prepare them to work in the IT market after graduation.

In this Summer Internship program, ITIDA collaborates with telecom and technology companies through Corporate Social Responsibility (CSR) initiatives. It also works with the National Telecommunication Institute (NTI) for its wide technical training experience and diverse partnerships with multiple global tech companies.

ITIDA offers two summer training programs:

1. ITIDA – NTI Joint Summer Training Program

The ITIDA-NTI Summer Training program consists of two main tracks and lasts for 120 hours total:

- **Technical Skills Track** – duration: 90 hours
- **Soft Skills / Freelance Track** – duration: 30 hours

This training program covers all the governorates of Egypt geographically. It depends on two learning systems: remote/online distance learning, or the traditional method of attending physically at the various training sites.

ITIDA-NTI Summer Training is a good opportunity for students to get technical training that matches the requirements of the labor market as well as international exams. Examples of training tracks:

No	Track Name	Level 1 (Year 1)	Level 2 (Year 2)	Level 3 (Year 3)	Target Audience	Interpersonal Skills
1	Cybersecurity	Network Infrastructure	Network Security	Fortinet Cybersecurity	Engineering & CS	Soft Skills
2	S/W Development	UI & UX Design	Web Design	MEAN-Stack Web Development; Full Stack Web Development (PHP)	Engineering & CS, BIS	Freelance

No	Track Name	Level 1 (Year 1)	Level 2 (Year 2)	Level 3 (Year 3)	Target Audience	Interpersonal Skills
3	Data Science	Data Analytics; Programming using Python	Advanced Data Analytics	Big Data Analysis; Internet of Things (IoT) Applications	Engineering & CS, BIS	Freelance / Soft Skills
4	Cloud Computing	Cloud Essentials	Cloud Architect	Building Datacenters	Engineering & CS	Soft Skills
5	Systems Administration	Linux Red Hat Administration	Windows Server Administration	–	Engineering & CS	Soft Skills
6	Artificial Intelligence	Machine Learning	AI For Business	Computer Vision; Natural Language Processing (NLP)	Engineering & CS, BIS	Freelance
7	Electronics	Microcontroller-Based Systems	Digital Design using FPGA	–	Engineering & CS	Freelance
8	Digital Arts	Graphic Design	2D Motion Graphics	Digital Marketing	BIS, Mass Communication, Fine Arts, Applied Arts, Specific Education	Freelance

2. ITIDA – Systel Joint Summer Training Program

For students of Communications Engineering, Computer Engineering, and Computer Science.

The ITIDA-Systel Training Program is comprised of:

- **Technical Skills Track** – duration: 90 hours
- **Soft Skills Track** – duration: 30 hours

Soft Skills Program (30 hours)	Technical Program (90 hours)
General Skills: • Communication Skills • Interview Skills • Presentation Skills Leadership Skills: • Teamwork Skills • Decision-Making and Problem-Solving Skills • Time Management Skills Freelancing Skills: • Introduction to Information Security and Privacy	• Introduction to Telecommunications • Public Safety Communication • Microwave and Broadband Communication • Fiber Optics Communication • CCTV Systems • Satellite Communication • Practical Workshop

Objectives

- Bridge the gap between universities and the labor market requirements
- Ensure the ICT sector's participation by providing necessary tech skills for students
- Build students' technical and soft skills
- Spread business culture among students and raise their awareness

Admission Criteria

Students who have completed the first, second, or third academic year.

Regarding:

- **NTI programs:** Engineering & CS, BIS, Mass Communication, Fine Arts, Applied Arts, Specific Education – Art Education Department (based on the training program)
- **Systel Program:** Faculty of Computer Science and Engineering

Registration

- Systel Program: **Closed**
- NTI Programs: **Closed**

Agenda

Summer vacation period each year: June, July, August, and September.

Benefits

- Offer university students certificates based on attendance stating that they have completed summer training
- Help students obtain the credit hours required by their faculties
- ITIDA pays the cost of international exams after the student passes them and submits evidence of passing
