

CLOUD PLATFORM DEVELOPMENT - WITH AI-ASSISTED OPERATIONS

Develops cloud and DevOps engineers: Linux administration (Red Hat), scripting (Bash/Python), containerization (Docker) and orchestration (OpenShift/Kubernetes), infrastructure-as-code (Terraform), CI/CD pipelines, configuration management, and multi-cloud fundamentals across AWS, Google Cloud, and Azure, with microservices and message-queuing concepts. Graduates automate build, release, and infrastructure provisioning and can support cloud-native operations, with awareness of generative-AI-assisted operations. Graduates suit Junior DevOps Engineer, Cloud Engineer, and Linux System Administrator roles. This is the one track that genuinely earns a cloud/DevOps title; it is not a software-development or machine-learning qualification.

JOB PROFILES

**DevOps Engineer · Platform Engineer · Cloud Engineer ·
Linux System Administrator · Workflow Automation Specialist**

TOTAL HOURS

1,329^{hrs}

Theory + hands-on labs

DELIVERY

Blended

Online & on-site

UNIVERSITY GRADE

Minimum grade required

CERTIFICATIONS

4

Where graduates work

Certifications earned

- CLF-C02** — AWS Certified Cloud Practitioner
- SAA-C03** — AWS Certified Solutions Architect – Associate
- RHCSA** — Red Hat Certified System Administrator
- CKA** — Certified Kubernetes Administrator

Selection process

01 IQ & English Exam

- Online exam covering problem-solving aptitude and English proficiency.

02 Technical Exam

- Computer-based assessment covering the program's core technical fundamentals.

03 Technical Interview

- Interview with the technical committee.

04 Interpersonal Interview

- Candidates who pass the technical interview are invited to this final stage.

Who may apply

Open to graduates of Engineering and Computers & Information Science.

Program content – 1,329 hours

CATEGORY	HOURS	SHARE	KEY COURSES
● Software Engineering Foundations	270 hrs	20%	Operating Systems Fundamentals, Computer Networks Fundamentals, Object-Oriented Programming, Data Structure and Algorithm, Database Fundamentals, Client-Side Technologies, Agile Software Development Methodologies
● Systems & Linux Administration	90 hrs	7%	Red Hat System Administration I, Red Hat System Administration II, Bash Shell Script, Apache & Nginx Web Servers
● Cloud Platforms	150 hrs	11%	Cloud Computing Fundamentals, Amazon Web Services, Google Cloud Platform, Microsoft Azure, OpenStack, OpenShift
● DevOps Toolchain	240 hrs	18%	Version Control Systems, Docker, Kubernetes, Helm, Istio, Jenkins, GitHub Actions, Argo CD, Configuration Management, Terraform, Prometheus & Grafana
● Backend Development & Databases	144 hrs	11%	Relational Database, NoSQL Database, Python, Django, Node.js, Web Services, Unit Testing
● Generative and Agentic AI	78 hrs	6%	Intro to Generative AI and Prompt Engineering, AI Workflow Automation and App Orchestration, Gen-AI Development Foundation, AI-Assisted Coding and AI Coding Agents, Advanced Gen-AI Programming: RAG and Agentic Software
● Soft Skills	57 hrs	4%	Communication Essentials for Professionals, High Impact Presentations, Job Seeking Skills, Professional Demeanor
● Graduation Project	300 hrs	23%	

Hands-on labs are conducted in-person. Online components cover theory and self-study modules on MaharaTech.

Student Deliverable

- Each student is required to:
- Complete at least one freelancing job.
 - Complete the Graduation Project.

Before you apply

Explore these resources before your interview. Applicants are expected to have reviewed these materials.
