

NTI–Huawei Egyptian Talents Academy (ETA)

National Telecommunication Institute (NTI) & Huawei Egypt

Source: <https://www.nti.sci.eg/eta/>

About the Initiative

The Egyptian Talents Academy (ETA) is a partnership between the National Telecommunication Institute (NTI) and Huawei Egypt, under the auspices of Egypt's Ministry of Communications and Information Technology (MCIT). It aims to build the digital capabilities of Egyptian students and university graduates through Huawei's advanced technology training programs, supporting Egypt's Vision 2030 toward a digital society.

Training is delivered at NTI branches and Creativa Innovation Hubs spread across almost all Egyptian governorates, moving trainees from basic levels up to associate, professional, and expert levels (Huawei's HCIA → HCIP → HCIE certification path). ETA aims to train 15,000 Egyptian youth over five years across fields including data networks (Datacom), cybersecurity, 5G, artificial intelligence, cloud computing, and big data.

Certification incentives: outstanding trainees can sit the official Huawei international certification exam for free; other trainees get a 70% discount on exam fees; and the top 10% of high-achieving graduates receive vouchers covering 100% of the international exam fees.

Key Facts

Organizers	NTI + Huawei Egypt, under MCIT
Certification track	Huawei ICT Academy levels: HCIA (Associate) → HCIP (Professional) → HCIE (Expert)
Typical level-1 duration	Minimum ~70 study hours (increases with training level); e.g. the AI track ran 80 hours / 12 weeks
Cost	Free scholarship (MCIT-funded); certification exam discounts as above
Delivery mode	In-person at NTI branches and Creativa Innovation Hubs across governorates
Eligibility	Egyptian nationals; suitable qualification or final-year student; track-specific prerequisites;
Enrollment rule	One training unit/track at a time (to ensure specialization and efficiency)
Attendance requirement	Minimum 80% attendance of total program hours
Certificate	One attendance/completion certificate issued per training unit, within ~1 month of completion

Enrollment Requirements

- Must be an Egyptian national.
- Suitable educational qualification, or be a final-year student.
- Fulfill the specific prerequisites of the chosen training track.
- Submit all required enrollment documents.

- Pass the admission test for that track.

Required Documents Upon Acceptance

- Copy of the national ID card.
- Copy of the graduation certificate (for graduates).
- Enrollment certificate or university ID showing current academic year (for students).
- One personal photo.
- Signed commitment statement agreeing to the scholarship conditions (downloaded/uploaded via the program website).

General Rules

- Create a personal account on the Academy's website to upload documents.
- Ensure accuracy of all information in the commitment statement.
- Meet the required attendance ($\geq 80\%$ of total hours).
- Maintain appropriate conduct with trainers and organizers.
- Pass required exams to receive attendance/completion certificates.
- Do not publish course materials online (IP rights).
- Submit a new signed commitment statement for each course enrolled in.
- Withdrawal requests must be sent at least 48 hours before the training start date.
- All official communication goes through ETA@nti.sci.eg.

Available Training Programs

The Academy currently lists 6 Huawei-certification-aligned programs. As with the enrollment rules above, a trainee can join one track at a time; each unit has its own prerequisites and admission test, and leads toward a specific Huawei HCIA-level certification.

1. Huawei Big Data Associate (HCIA-Big Data)

Introduces big-data fundamentals and the open-source big-data ecosystem (e.g. Hadoop-family components), plus Huawei's big-data platform and solutions. Covers data collection, storage, processing and analysis at an associate/foundational level, preparing trainees for the HCIA-Big Data certification exam.

2. Huawei Enterprise Datacom Technologies (HCIA-Datacom)

A foundational networking track covering data-communication concepts, IP addressing, routing and switching, WLAN basics, and network management/maintenance using Huawei enterprise networking equipment — the Huawei-certification equivalent of a CCNA-style networking foundation. Prepares trainees for the HCIA-Datacom exam and is a common prerequisite for more advanced Datacom (HCIP) study.

3. Artificial Intelligence (AI) (HCIA-AI)

Covers Python programming fundamentals and the math foundations needed for AI (basic linear algebra, probability/statistics), then moves into core AI/ML concepts such as classification, regression, and clustering, plus Huawei's AI tools and platforms. In its NTI-Aswan run this track was 80 hours across 12 technical lectures over 2 weeks (morning 9am–3pm or evening 3pm–9pm sessions), open to 2nd/3rd/4th-year students and graduates of the last 10 years, and leads to the HCIA-AI certification.

4. Cloud Computing (HCIA-Cloud Computing)

Introduces core cloud-computing concepts (service/deployment models, virtualization of compute, network and storage resources) and Huawei's cloud stack and cloud-service products, building the foundation-level skills needed for the HCIA-Cloud Computing certification.

5. HCIA-Security

A foundational cybersecurity track covering information-security concepts and basic configuration and maintenance of security solutions for small/medium enterprises — firewalls, access control, and core security principles — aligned with the HCIA-Security certification.

6. Master 5G Mobile Network Technology with HCIA-5G

Covers the evolution of mobile network technologies and 5G network architecture, including 5G radio access network and core network fundamentals, terminology, and key technologies — aligned with the HCIA-5G certification.

Note: program titles and the overall ETA structure (about, terms, enrollment rules, FAQ) are taken directly from the official NTI ETA page. The per-program descriptions above summarize what each named Huawei certification track (HCIA-Big Data, HCIA-Datacom, HCIA-AI, HCIA-Cloud Computing, HCIA-Security, HCIA-5G) typically covers, since the exact scope/objectives text for each course is loaded via JavaScript pop-ups on the site and isn't available as static text — except for the AI track, where concrete hours/schedule details were found in an official NTI announcement (Aswan branch).

Training Locations (by Governorate)

Courses are offered at NTI branches / Creativa hubs in:

Alexandria • Aswan • Asyut • Cairo (Nasr City) • Cairo (New Capital) • Dakahlia (Mansoura) • Fayoum • Gharbia (Tanta) • Giza (Cairo University) • Giza (Smart Village) • Menoufia • Minya • North Sinai (Arish) • Port Said • Qalyubia (Benha) • Qena • Sharqia (Zagazig) • Sohag

Frequently Asked Questions (selected)

Who is eligible?

Holders of a suitable qualification or final-year university students, meeting each track's specific requirements.

Is attendance at NTI required?

Yes — training is held at NTI premises or Creativa hubs in the governorates.

Theory or practical?

Both — practical/hands-on training is included using the latest tools relevant to each track.

Can I join more than one track at once?

No — only one training unit at a time, to ensure specialization.

Do I retake the admission test for a new unit in the same track?

Yes — each unit has its own conditions and admission test.

How soon are interview dates sent?

Within two weeks of the registration closing date.

When are certificates issued?

Within about a month of completing the training unit, sent by email.

How do I withdraw or defer?

Email ETA@nti.sci.eg at least 48 hours before the start date with your name, national ID, track, and registration number.

Compiled from the official NTI ETA website (<https://www.nti.sci.eg/eta/>) and related public NTI/Huawei announcements. Course availability, exact hours, and schedules vary by cycle and governorate — check the official site and ETA@nti.sci.eg for the current intake.
