

3D ANIMATION

The Digital Arts & 3D Animation track develops graduates into production-ready CG artists and animators capable of rigging, animating, and polishing character and creature performances at a professional studio level. Across 1,800 hours, participants build hands-on expertise in cinematography and visual storytelling, rigging, body mechanics and acting-based animation, texturing and rendering — alongside integrating modern AI tools into the creative pipeline to stay aligned with the industry's latest developments — preparing them for high-demand roles across Egypt's growing animation, gaming, and VFX studios, as well as international outsourcing and remote production pipelines.

JOB PROFILES

3D Rigger · Layout Artist · Creature Animator · VFX Animator

TOTAL HOURS

1,353hrs

Theory + hands-on labs

DELIVERY

Who may apply

Applications for our creative and design tracks are open to graduates and final-year students from all academic disciplines and recognized universities, provided they complete their degree prior to program enrollment. While anyone with a passion for design can apply, we highly encourage and give preference to graduates from all Art-related backgrounds, including Fine Arts, Applied Arts, Art Education, Computer Graphics, and Media & Design. In line with our inclusive admission policy, a minimum graduation tier of Fair is fully accepted."

Selection process

01 IQ & English Exam

Online exam covering problem-solving aptitude and English proficiency.

02 Technical Exam

Computer-based assessment covering the program's core technical fundamentals.

03 Technical Interview

Interview with the technical committee.

04 Interpersonal Interview

Candidates who pass the technical interview are invited to this final stage.

Program content – 1,353 hours

● Soft Skills	57 hrs	4%	Communication Essentials for Professionals, High Impact Presentations, Job Seeking Skills, Professional Demeanor
● Graduation Project	300 hrs	22%	

Student Deliverable

To successfully complete the track, every student is required to submit a fully produced 3D animated short film or character animation reel that demonstrates professional-quality storytelling, character design, rigging, animation principles, and production workflow, meeting industry standards.

Software/Vendor Certificates (Upon Request):

In addition to the final project, students may be required to obtain and submit official software certifications for designated courses, only if requested by the track leader during the program.

Each student must complete at least one freelancing project and earn one internationally recognized certification relevant to the track before graduation.

Before you apply

"We highly recommend that candidates review the following courses prior to applying for admission to our program."

"The courses cover multiple points in the specialization areas of 3D Art tracks."
