● Graduation Project	300 hrs	23%	

Hands-on labs are conducted in-person. Online components cover theory and self-study modules on MaharaTech.

Student Deliverable

To successfully complete the track, students are required to collaborate in teams to deliver a professionally composited VFX final project. The project must demonstrate advanced compositing techniques—including keying, rotoscoping, camera tracking, CGI integration, color matching, and final shot finishing—while following industry-standard production workflows and quality requirements. Each student is expected to make a clearly defined contribution to the final production.

Freelance Project Requirement:

In addition to the final project, every student is required to complete at least one freelance or client-based compositing assignment, demonstrating the ability to deliver production-ready work, communicate with
