

.NET ENTERPRISE SOLUTIONS DEVELOPMENT & ARCHITECTURE FOUNDATIONS WITH AI INTEGRATION

Produces .NET enterprise full-stack developers: ASP.NET Core apps, Web APIs, , gRPC with C# and Entity Framework over SQL Server, Angular front-end, and Azure/Docker deployment, applying SOLID, DDD and event-driven design, and TDD. A strong, .NET-native generative-AI strand — integration, RAG , agents and MCP — lets graduates ship AI features on the Microsoft stack; graduates also gain Power Platform, CRM, and Power BI skills. They suit .NET Developer, ASP.NET Core Developer, .NET Full-Stack Developer, and Power Platform / Dynamics 365 Developer roles, with AI application/integration as a portfolio-backed secondary. Develops AI-assisted enterprise engineers, not machine-learning engineers, prepared to contribute to — not lead — architecture.

JOB PROFILES

.NET Full-Stack Developer · .NET Backend Developer (Web APIs & Microservices) · Enterprise Application Developer (.NET) · Dynamics 365 & Power Platform Developer (CRM) · Business Intelligence Developer (Power BI) · I Application Developer (.NET/Semantic Kernel) · AI Application Developer (.NET/Semantic Kernel)- (Generative AI — LLM · RAG · Agentic) · AI Automation Developer (n8n)

Who may apply

Open to university graduates with a minimum graduation grade of Good or higher. Prefer graduates in Computer Engineering, Computer Science, and related disciplines.

Selection process

01

IQ & English Exam

Online exam covering problem-solving aptitude and English proficiency.

02

Technical Exam

Computer-based assessment covering the program's core technical fundamentals.

03

Technical Interview

Interview with the technical committee.

04

Interpersonal Interview

Candidates who pass the technical interview are invited to this final stage.

Program content – 1,313 hours

CATEGORY	HOURS	SHARE	KEY COURSES
● Software Development Fundamentals	249 hrs	19%	Agile, Data Structures & Algorithms, Database Fundamentals, OOP, Software Engineering & UML, Unit Testing, Source Control, Secure Coding, Operating Systems, Networks
● Core	689 hrs	52%	Advanced SQL Server , Visual C#, LINQ & Entity Framework 6 & core, ASP.NET Core Enterprise Applications, ASP .Net Web APIs, Intro to gRPC, SOLID, .Net Design Patterns, Responsive web, ES.Next, Type Script, Angular Fundamentals, DDD, Event Driven & Event Sourcing, Aspect Oriented, Microservices, MS-Azure, Cloud App Scalability, TDD, Power Platform & CRM 365, MSSQL BI, Power Apps, CRM (Sales, Customer Service), Power BI, Intro to DM, DW, Gen AI & Prompt Engineering, AIAssisted Coding & AI Agents, AI Automation & Orchestration, Gen-AI Development Foundations, RAG & Agentic AI, AI for Power BI, Docker and Kubernetes, IIS Administration
● Soft Skills & Career Development	75 hrs	6%	Communication skills, Presentation Skills, Job Seeking Skills, Professional Demeanor, Remote Working Practices, Teamwork & Leadership Skills, Freelancing
● Graduation Project	300 hrs	23%	

75% face to face Learning| 25 % Online, Common Hardware ,Common Software

Student Deliverable

By the end of the program, each participant is expected to deliver at least ONE freelancing job and an international certificated on his track
